

Access to Worship

The church seeks to provide access to the Word of God for all those who meet with us. A Disability Access audit has been carried out against the appropriate criteria. The church makes reasonable adjustments to ensure those with disability are not at a disadvantage.

The church uses a sound amplification system and those who speak to the congregation are equipped with microphones. In addition there is an induction loop system to assist those who have difficulties in hearing.

For those who cannot attend our services, because of illness or infirmity, we record every sermon on CD so that everyone can hear God's Word by requesting a copy. Additionally each Lord's day the morning and evening sermons are placed on our website.

The church makes provision for users of wheelchairs and assistance is given where required. The church has a toilet equipped to the standards required to address disability issues
